Thawte's Digital Certificates:

We now offer Thawte's Digital Certificates! The Pioneer in Digital Certificates as well as the most reliable digital certificate brand in the industry today. Thwate is part of the Verisign company. It is a brand to reckon with and is well-recognized by users around the world. What's more, we are providing Thawte's Certificates to our Resellers at the lowest prices in the industry.

Key Benefits for Resellers:

- Another addition towards becoming a complete 'One-Stop-Shop'
- Competitive advantage to your Reseller Business
- Greater customer satisfaction/confidence
- Safer Business environment for your customers as well as yourself

We offer the following 4 different Digital Certificates for you to resell to your Customers thus catering to the different needs of all your Customers:

SSL "Quick-Issue" Cert

SSL "Quick-Issue" Cert offers upto 256-bit encryption and is issued within minutes of applying for it. This is an entry level certificate which provides basic validation and authentication for your Customers. If your Customers require an SSL certificate immediately, and are setting up a basic web presence, then this certificate is the perfect choice for them. Through SSL encryption, the certificate assures that information is kept private between your web server and your client's web browsers.

Features:

- Upto 256-bit encryption
- Highest Browser Recognition in the industry
- Quick Issue
- Domain name verification
- Thawte Trusted Site Seal
- Unlimited Free Reissues
- Supports IDN

SSL "Extra-Secure" Cert

The SSL "Extra-Secure" Cert offers comprehensive authentication procedures whereby the certificate owner's corporate identity is verified by Thawte. The application process for an "Extra-Secure" cert therefore takes longer than a "Quick-Issue" Cert. This provides higher assurance and greater comfort while transacting online. This certificate is ideal for people who are serious about security and client perception.

The certificate not only assures private submission of information between the web server and the client's web browsers, but provides assurity of the certificate owner's corporate identity. An SSL "Extra-Secure" Cert communicates the certificate owner's seriousness about client security.

Features:

- Upto 256-bit encryption
- Highest Browser Recognition in the industry
- Provides Domain and Identity authentication and verification
- Thawte Trusted Site Seal
- Stringent Business Verification
- Issued within 2 days
- Unlimited Free Reissues
- Supports IDN

SSL "Extra-Secure" Cert

The SSL SuperCert is the strongest encryption certificate in the market today. It offers all the advantages of the "Extra-Secure" Cert and additionally guarantees higher encryption standards even if clients are using older browsers with limited encryption capability. It automatically steps-up the encryption of the client even if their browsers have 40-bit or 56-bit encryption capabilities. The SSL SuperCert assures that the information submitted is encrypted using the highest possible encryption standards apart from assuring the certificate owner's corporate identity.

This certificate would be the ideal choice for any serious e-commerce business website.

Features:

- Upto 256-bit encryption
- Supports SGC and step-up Technology
- Highest Browser Recognition in the industry
- Automatic step-up for older browsers
- Stringent Business Verification
- Issued within 2 days
- Thawte Trusted Site Seal
- Unlimited Free Reissues
- Supports IDN

"Wild-carded" Cert

This is a unique product that gives the ability to secure multiple sub-domains within the company through a single certificate. A wild-carded certificate can be used to secure the certificate owner's website (www.yourcompany.com) and all sub-domains (eg shop.yourcompany.com, pay.yourcompany.com etc) with a single certificate.

If there is a requirement of securing multiple sub-domains on a website, then a "Wild-carded" certificate is the ideal choice.

Features:

- Upto 256-bit encryption
- Secures Unlimited Subdomains
- Highest Browser Ubiquity in the industry
- Stringent Business Verification
- Issued within 2 days
- Thawte Trusted Site Seal
- Unlimited Free Reissues
- Supports IDN

The Thawte Trusted Site Seal

Once a Thawte SSL certificate is obtained, the certificate owner will be able to display the Thawte Trusted Site Seal on the website. Given above is an example of the same.
